

J&N Coding Club Assignment 1

Question 1

1. Write a program that outputs your name and surname on two different lines
2. Write a program that subtracts two integers(7 and 4) and outputs the results as follows

NB: You need to make use of place holders

The difference between 7 and 4 is 3

Assume that the first integer is bigger than the second one.

3. Modify the program above and instead ask the user to input both integers and find the difference and the sum and present them to the user.
4. Write a program that request the users(you) biographical details, these include the following
 - Name
 - Date of Birth
 - Location(Province/Country-if you are not from SA)
 - Age

//NB please take a screenshot of the code and the output for the above question. We want to capture your details

Challenges

5. Write a program that asks a staff member at which age he/she joined the NMMU staff and how many years ago that was. The program must then display the staff member's age
6. Write a program that requests from the user how many watermelons he has as well as the weight of a watermelon. The program must then print the total weight of all the watermelons. [The symbol used for multiplication is the *]
